# FOREWORD

This publication, *More Words on Aging*, is the supplement promised when our most recent bibliography *Words on Aging* was published in October 1970.

It becomes available as preparations quicken for the vitally important White House Conference to be held in late November of this year. We look to this Conference for the development of that effective and informed national policy on aging for which the President has asked. It is essential to the well being of all older Americans, now and in future.

The extent of interest in, and increasing visibility of, problems and potential of older people are attested by the large number of titles listed in this supplement—all published during late 1968, 1969 and 1970.

Much of this growing national concern stems from hundreds of preliminary local and State meetings held in preparation for the forthcoming Conference. Much also is due to the increasing role being played in national and community life by older people themselves. It is winning support in the Congress, the State Houses, and in commitment of citizens of all ages to the improvement of the quality of life for the elderly.

We trust this bibliography will be useful in making further progress possible.

# PREFACE

This supplement has the same arrangement, purpose, and objective as *Words on Aging* (Government Printing Office, 1970) namely, to assist all persons working in the field of aging. It brings that work up to date by covering the books, periodical articles, and pamphlets published in the years 1968-1970 inclusive. It is especially hoped that it will be useful to those who are involved in the White House Conference on Aging scheduled for November, 1971.

The references herein were selected and annotated by Miss Dorothy M. Jones, Social Science Specialist, under the direction of Mr. Charles F. Gately, Chief, Reader Services Branch, with the advice and guidance of specialists in the Administration on Aging.
